INTER-OFFICE CORRESPONDENCE

REILLY TAR & CHEMICAL CORPORATION

TO: MR. C. F. LESHER - IN'DPLS. OFFICE: 3t. Louis Park
FROM: Mr. H. L. Finch DATE: November 8, 1968
SUBJECT: AIR POLLUTION ODOR CONTROL

Please find attached two copies of Dr. Paulus's letter and possible program of study of the odor problems from our stills. The price of \$1,250.00 comes as quite a shock to us but since we do not know what an examination of this type entails, we have no basis to evaluate the \$1,250.00.

Mr. White has written for some literature on an analyzer that was advertised in the recent "Pollution Equipment News" you forwarded from Indianapolis. It may be that some equipment has already been designed that could give us the type of analysis we need at a lesser cost than what Dr. Paulus proposes.

It might be well to discuss an examination of the type Dr. Paulus proposes with someone in our chemical laboratory. They might be able to give us an idea if such a study could entail the expenditure of \$1,250.00. Dr. Paulus did mention to us in our conversations with him at lunch the other day that he had two graduate students working on pollution control and that he would assign those two students to the problem of control by burning.

Please let us have your comments.

Yours very truly,

H. L. Finch
